

SOFTWARE TECH ENTERPRISES

Providing Business Solutions Not Ideas

Company Overview

Software Tech Enterprises, Inc. (STE), founded in 2002, is an SBA SDB, HUBZone JV, ISO 9001:2015 certified and appraised at CMMI maturity Level 3 for Program & Project Management, that specializes in providing Management Consulting and Information Technology (IT) services for the Government and Commercial sectors. STE delivers a wide range of solutions and services within a set of core capabilities that include: IT Management, Enterprise Management Services, Enterprise Data Management Services, Data Warehousing Services, Business Solution Services, Cyber-security Training, and Project Management Services. STE implements methods, strategies, and approaches to increase productivity, improve information sharing, and reduce cost. Rapid and efficient deployment of effective IT solutions, services and hardware—combined with Industry Best Practices, experienced professionals, and an overall commitment to quality has established STE as a premier IT provider.

To Achieve the Best Results, You Need the Right People

Today, leading companies depend upon end-to-end integration of data sharing solutions across an entire organization. At Software Tech Enterprises (STE), we believe that in order to achieve the best results, you need targeted solutions and the right people. With the explosion of information and the internet, the connected enterprise requires interfaces that link different systems and companies. This newly created "value chain" promotes the sharing of information across an expanding array of business functions. STE provides experienced Information Technology (IT) professionals who possess a wide range of experience in Project Management, Enterprise Architecture, Service Oriented Architecture, Information Architecture, Business Process Improvement, System and Data Integration, Data Warehousing, Cyber Security, Information System Security and other IT/Enterprise support services.

What Sets Us Apart - Experience and Expertise

While there are many firms that possess the technical skills to develop and integrate software applications, few have the ability to provide and implement business solutions. Software Tech Enterprises (STE) has a proven track record of aligning technology solutions with our customers' business strategies to help them accomplish their overall business goals and objectives. With most IT-centric projects, understanding the various challenges and choosing the right strategy are the most critical steps toward researching and implementing solutions. Software Tech Enterprises has over two decades of experience implementing complex business solutions. Moreover, STE has can leverage our past performance to assist our clients in solving their business challenges and implementing IT solutions.

Custom Consulting for Vertical Markets

Software Tech Enterprises is committed to building successful business systems using superior software, sound solutions, proven methodologies, rapid implementation, and exceptional support. Additionally, our technical resources have the knowledge and expertise to follow through on that commitment in every client engagement. STE's vertical focus includes Federal Government, State and Local Government, Financial Services, and Consumer Services. Within these industry sectors, we implement solutions that align with our core competencies, leveraging our experience in such key areas as Enterprise Architecture, Service Oriented Architecture, Risk Management, Enterprise Data Management, Data Governance, Data Architecture, Data Warehousing, Business Process Management, Business Process Re-Engineering, Program and Project Management, Change Management, IT Environment Assessments, and IT Support Services.
